TO WHOMSOEVER IT MAY CONCERN

This is to certify that Mr Reza Namazi is working in a research group under my supervision. Our research is focused on efficient solution of large sparse linear systems. Reza has been active in a couple of fronts including algebraic multigrid method (AMG) for sparse systems, and parallel processing and GPU acceleration techniques. While working on multigrid methods, not only he was an active team member to learn and implement the existing methods but also he led an effort to embed artificial intelligent techniques in agglomeration process. The research is still underway. His current focus is on GPU acceleration using OpenCL.

I will be glad to provide you with further information if you may require so.

Yours Sincerely,
Mahdi Sani
